

DATA VISUALISATION IN SHAREPOINT

FREE HALF DAY BI CONSULTANCY – DRIVING ADDITIONAL VALUE FROM YOUR DATA

For organisations that have already implemented a SharePoint intranet the opportunity to further enhance business intelligence capabilities and present live data stored across the organisation in a meaningful and compelling way is within easy reach.

DO YOU HAVE:

- ▶ Microsoft Office SharePoint Server 2007?
- ▶ A structured data source?
- ▶ A requirement for enhanced data visualisation and reporting?

If so, Concentra is offering a free half day of business intelligence consulting to help identify your reporting needs and develop a plan for rapid enhancement of your data visualisation. In many cases the addition of a one-time license to the commonly held combination of SharePoint and structured data source can provide state-of-the-art reporting capabilities that are set up and implemented in just a matter of days.

THE PROCESS

Concentra, the business consulting and technology company, will work with you to highlight the opportunities that BI offers your organisation. The output of this session will define your BI objectives and a BI roadmap which will document both short and longer term goals and then present clear and pragmatic steps to help you get started. Concentra has the technical expertise and business knowledge to help companies of all sizes drive value from their data. From identifying the right KPIs to implementing simple yet effective data management and presentation we can help you realise the potential that business intelligence offers. If you would like more information on business intelligence or to book your free half day of consultancy please call **020 3355 8008**.

DATA VISUALISATION IN SHAREPOINT

WHY BI?

21st century organisations enjoy a wealth of data outputs across all operational areas. What differentiates industry leaders is their ability to utilise that data to drive efficient business decisions. Industry analyst Gartner consistently lists business intelligence as a top three priority for CIOs and senior executives, recognising it as a real driver of improved efficiency and gaining competitive advantage. However the same research finds only 20% of companies are currently achieving their BI goals. Let Concentra help you take the first steps towards succeeding with BI.

ABOUT CONCENTRA

Concentra was formed as a response to today's increasingly complex business environments. We partner with clients to deliver innovative products and solutions that grow profit and improve service to customers. We combine our core strengths of business consulting, data analytics and technology to create easy-to-use tools that deliver ongoing benefits from day one.
